

CORE EQUITY STRATEGY

as of 12/31/2024

OVERVIEW

In the fourth quarter of 2024, equity markets made gains to round out a strong year for the S&P 500 index which saw a 25% return in 2024. Once more, market performance this quarter was largely driven by the same technology stocks that have been propelling their growth over the past two years. Consumer discretionary, communication services, and financials rose around 14%, 9%, and 7%, respectively, while other segments, such as materials, health care, and real estate, posted around -12%, -10%, and -8% returns in contrast to the S&P 500's gain of around 2% in the 4th quarter.

For the year, markets were driven by the strong performance of Technology stocks, buoyed by increased capital spending to expand data centers supporting Generative AI. Financial stocks also performed well, supported by the Federal Reserve's decision to lower short-term interest rates as inflation moved closer to its 2% target. The Consumer Discretionary sector enjoyed a solid year as U.S. consumers, still benefiting from strong employment, maintained healthy spending patterns, albeit at a more normalized pace.

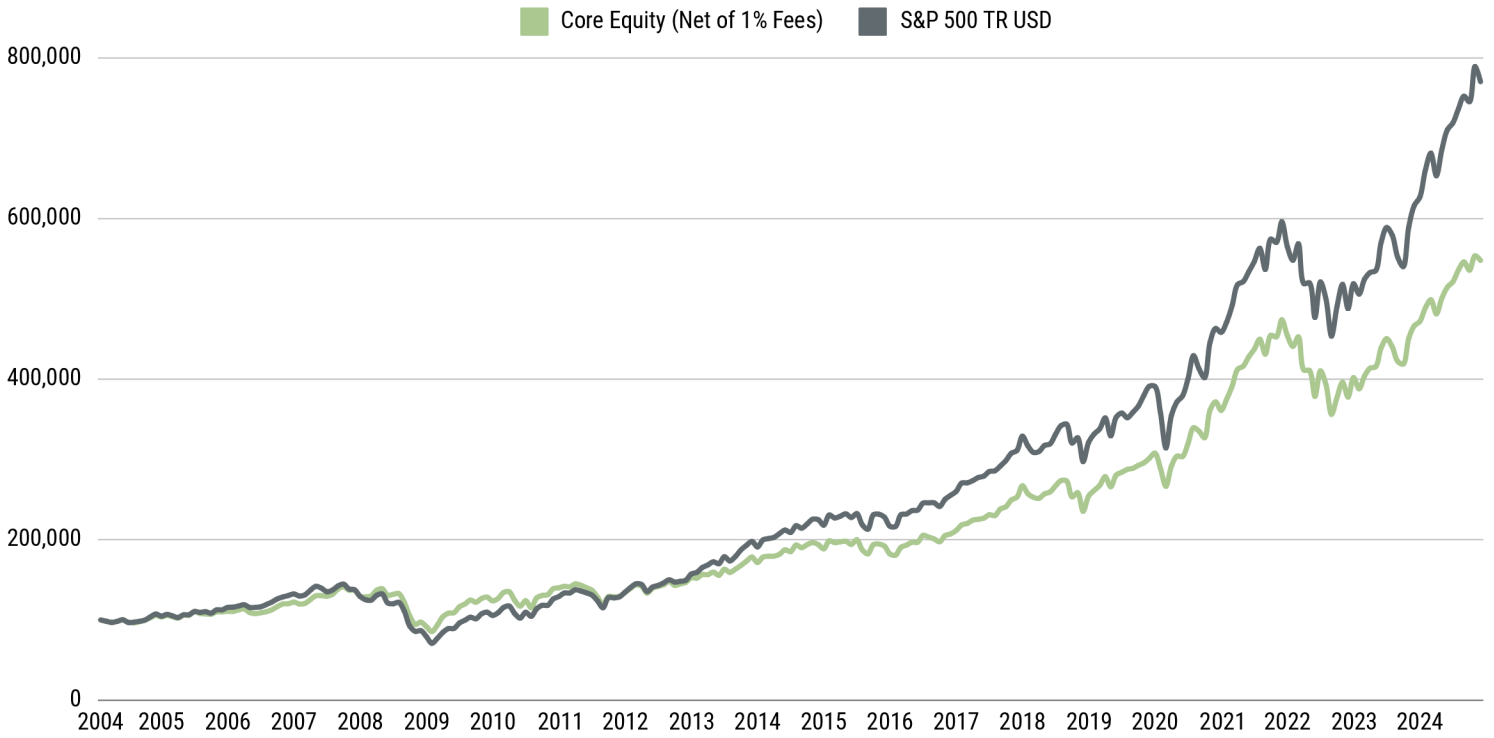

Overall, the market's earlier apprehensions surrounding the November elections have dissipated, with the associated risks now fully priced out. Investors are shifting their focus toward anticipated economic growth driven by policy changes, particularly deregulation and tax cuts. This renewed optimism reflects expectations of a business-friendly environment that could stimulate corporate earnings, encourage investment, and boost overall economic activity. However, tariffs remain a significant wildcard for economic growth, as their long-term impact on trade dynamics, supply chains, and consumer prices is still uncertain.

From a portfolio standpoint, we added a few new names: Estee Lauder, CDW Corp, Thermo Fisher, Union Pacific, Xylem, and Bio-Rad. We exited positions in STMicroelectronics, Merck, Canadian Pacific, Crown Castle, and Constellation Brands in the quarter.

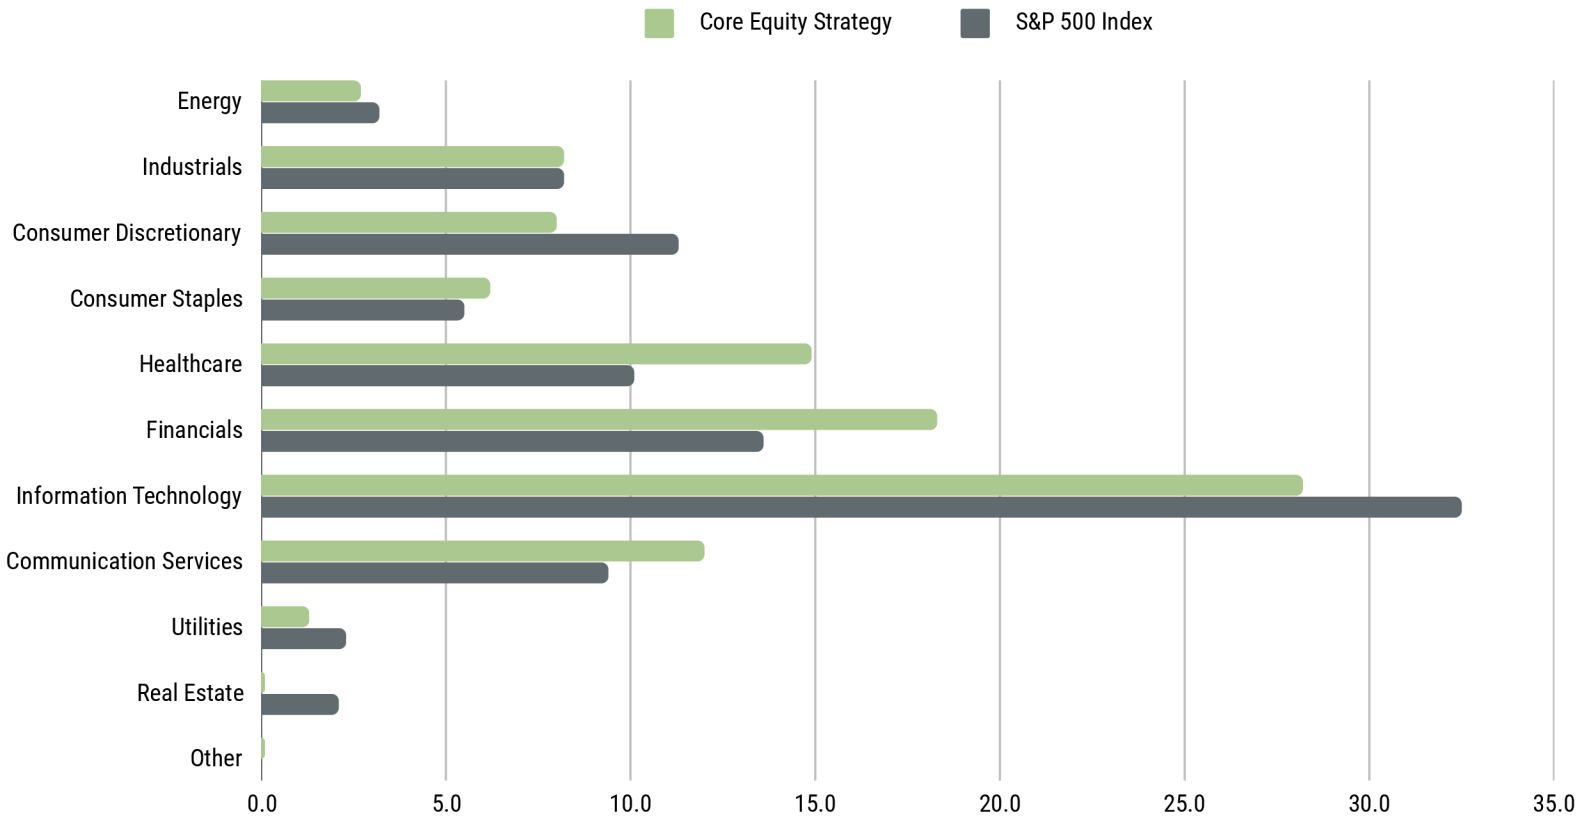

Apple Inc	6.4	Berkshire Hathaway Inc Class B	2.9
Alphabet Inc Class C	6.1	UnitedHealth Group Inc	2.9
Amazon.com Inc	4.9	Mastercard Inc Class A	2.7
Microsoft Corp	4.8	Visa Inc Class A	2.7
Meta Platforms Inc Class A	3.8	Other	59.1
iShares® 0-3 Month Treasury Bond ETF	3.7

MEET THE TEAM

PETE TRONTIS, CFA Sr. Portfolio Manager

Pete joined Exencial Wealth Advisors as a portfolio manager for the Enhanced Yield strategy. Prior to joining Willingdon, he was a research analyst for Horizon Investments where he focused on global equity research and supported the firm's trading and performance reporting operations. Prior to Horizon Investments, Pete was a Market Risk analyst for Wells Fargo Securities. He began his career as an analyst for Liquid Credit Products at Bank of America.

Pete holds a BS in Finance and a BS in Economics from DePaul University where he graduated cum laude. He also holds an MBA from Duke University where he graduated in the top 10 percent of his class and was designated a Fuqua scholar. He is a CFA charterholder and a member of the CFA society of North Carolina.

RANDY FARINA, CFA Sr. Portfolio Manager

Randy joined Exencial as a Senior Portfolio Manager for the Core and International Strategies. Randy has an extensive background in global equities with over 20 years' experience as an analyst and portfolio manager. Randy also has experience in client service partnering with both institutional and retail relationship managers. Before Exencial, Randy was a Portfolio Manager and Analyst for 16 years on the Global Small Cap Team for Putnam Investments. Randy helped implement a structured investment process focusing on intrinsic value. During his tenure at Putnam Randy also developed and managed an apprentice program to train and develop junior analysts. Randy most recently comes from Westwood Global in Boston where he was a Senior Research Analyst focusing on an International Large Cap Strategy.

Randy has a Master of Science in Finance from Boston College and a Bachelor of Science in Business Administration from the University of Massachusetts at Lowell. Randy is a CFA charterholder.

DISCLOSURE

Exencial Wealth Advisors ("Exencial") is an SEC registered investment adviser with its principal place of business in the State of Oklahoma. Any references to the terms "registered investment adviser" or "registered," do not imply that Exencial or any person associated with Exencial has achieved a certain level of skill or training. Exencial and its representatives are in compliance with the current registration and notice filing requirements imposed upon registered investment advisers by those states in which Exencial maintains clients. Exencial may only transact business in those states in which it is notice filed, or qualifies for an exemption or exclusion from notice filing requirements. This report is limited to the dissemination of general information pertaining to its investment advisory services. Any subsequent, direct communication by Exencial with a prospective client shall be conducted by a representative that is either registered or qualifies for an exemption or exclusion from registration in the state where the prospective client resides. For information pertaining to the registration status of Exencial, please contact Exencial or refer to the Investment Adviser Public Disclosure website (www.adviserinfo.sec.gov).

Past Performance is no guarantee of future results. The information contained herein should not be construed as personalized investment advice. Performance results prior to July 2020 occurred under the management of another investment advisor, Willingdon Wealth Management ("WWM"). That portfolio manager was solely responsible for selecting the securities to be bought and sold and was affiliated with an investment advisor other than Exencial. WWM and its strategies were acquired in July 2020 and at that time became part of Exencial and its investment strategies. The investment results prior to July 2020 are based on the performance of the Core Equity Strategy in WWM accounts. Exencial now has access to and maintains the records supporting the performance of these accounts from inception to July 2020 and thereafter. From 03/01/2004 through the current month performance is based on the composite return net of fees of accounts invested in the Core Equity Strategy. Accounts where the portfolio managers do not have full discretion to manage the updates from either the client or advisor are excluded from the composite.

All performance returns reflect the reinvestment of dividends and other earnings and the deduction of Exencial's investment advisory fee. Exencial's investment advisory fees are described in Part 2A of its Form ADV, which is available upon request. Clients may also incur other transactions costs such as brokerage commissions, custodial costs, and other expenses which are not reflected in the performance returns. Actual client accounts utilizing the Core Equity Strategy may experience different weightings and allocation and as such the performance of a specific individual client account may vary substantially from the Core Equity Strategy results. Exencial may depart from its strategic asset class allocations for particular strategies and allocate more or less to any asset class, or to other asset classes, in an attempt to add to the portfolios' overall returns. Exencial makes no representations that the results presented herein reflect the typical experience of an Exencial client nor that current or prospective clients will experience similar results in comparable situations. The Core Equity Strategy holdings listed herein do not represent all of the securities purchased, sold, or recommended for clients during the reflected time period. Information on the methodology used to calculate the performance and a list reflecting the contribution of each holding in the Core Equity Strategy Composite's overall performance during the time period is available upon request. Different types of investments involve varying degrees of risk, including total loss of principal, and there can be no assurance that any specific investment or investment strategy will be profitable or equal the results portrayed herein. Information presented herein is subject to change without notice and should not be considered as a solicitation to buy or sell any security. Comparison of the Core Equity Strategy to the various indexes or benchmarks set forth above is for illustrative purposes only and the benchmarks have not been selected to represent the most appropriate or comparable benchmark with which to compare the Core Equity Strategy performance, but rather to allow for comparison of the Core Equity Strategy's performance with well-known and widely recognized benchmark indexes. It is not possible to directly invest in an index, as indices are unmanaged, hypothetical vehicles that serve as market indicators and do not account for the deduction of investment management fees or transaction costs generally associated with investable products, which otherwise have the effect of reducing the performance of an actual investment portfolio. The securities held in clients' accounts following a particular strategy and the Core Equity Strategy may differ significantly from the securities included in a benchmark index, and the volatility of the securities may differ significantly from that of the benchmark index. A description of each index is available from us upon request. References to specific securities are presented principally to illustrate the firm's investment methodology or approach and are not being referenced to demonstrate Exencial's performance or investment results. Exencial is under no obligation to hold any equity position for any time period and Exencial's current recommendations are subject to change at any time without notice. A complete list of portfolio holdings and specific securities transactions for the preceding 12 months is available upon request. The information contained herein, while not guaranteed as to the accuracy or completeness, has been obtained from sources we believe to be reliable.

The S&P 500® is widely regarded as the best single gauge of large cap U.S. equities. This index includes the 500 leading U.S. companies and covers approximately 80% of the available equities market cap in the U.S.
