Craig Wezenski, MBA
Partner and Director of Business Development

Craig is a seasoned financial professional who has over 26 years of experience. He received his Masters in Business Administration in Finance from the University of New Haven in 2004. Craig received his undergraduate degree in Finance, with a minor in Psychology, from Bryant University in 1997.

Prior to joining Exencial Wealth Advisors, Craig worked for Fisher Investments, Fidelity Investments and Ameriprise. He began his career at Ameriprise, where he spent 9 years in various financial and management roles. He then joined Fidelity Investments, where he spent 8 years. His most recent role was as a Vice President, Senior Account Executive managing \$1.5 billion for over 600 families. During his tenure at Fidelity, Craig was the recipient of the Fidelity Achiever Award, awarded to him multiple years. This award is one of Fidelity's highest recognition awards.

Craig has spent much of his career helping individual clients meet their financial goals and achieve financial freedom. He will explain the Exencial Wealth Advisors approach and how it compares to other money management options currently available to you. Craig will review your current financial situation, discuss your personal investment goals and objectives, and help determine how Exencial Wealth Advisors can best benefit you.

In his spare time, Craig enjoys spending time with his wife, son, and daughter. Craig is an avid outdoorsman and loves to give back to his community. Some of his hobbies include spending valuable family time doing the following: golfing, fishing, camping, and boating.

FIRM OVERVIEW

ExencialTM

Wealth Advisors

Exencial is a nationally based firm that began in 2003 with a foundation of superior advice and execution. Since our genesis, we have crafted a team of professionals who hold designations including CPA, CFA Charterholder, CFP® professional, and CIMA® to deliver advice across the many disciplines of wealth management. These disciplines include tax preparation, individual investment management, financial planning, estate plan construction, risk management, and philanthropy.

Our clients have access to the Portfolio Management Team whose members oversee our investment strategies that include individual stocks, individual bonds, options, ETFs, and mutual funds.

We strive to remain a **servant-leader** across the wealth management industry, respected for our **wisdom, integrity, exceptional service, financial advice and investment expertise.**

Exencial
Wealth Advisors™

Craig Wezenski, MBA

Director of Business Development
(203) 298-8523
cwezenski@exencialwealth.com

Craig has spent the majority of his career helping individual clients meet their financial goals and achieve financial freedom. He will explain Exencial Wealth Advisors approach and how it compares to other money management options currently available to you. Craig will review your current financial situation, discuss your personal investment goals and objectives, and help determine how Exencial Wealth Advisors can best benefit you.

Derrick Longo, MBA

Senior Wealth Advisor
(704) 464-5983
dlongo@exencialwealth.com

Derrick is a wealth planning professional with 10+ years of experience in the financial services industry with a focus in financial planning and risk management for individuals and businesses. Prior to joining Exencial Wealth Advisors in 2020, Derrick worked for a regional retirement provider helping businesses and individuals reach their retirement goals. Derrick graduated from the Southern Connecticut State University with a Master's degree in Business Administration.

David Poudrier, CFP®

Senior Wealth Planner
(240) 997-9064
dpoudrier@exencialwealth.com

David is a wealth planning professional with over a decade of experience in the financial services industry focused on educating clients on wealth management topics and helping them avoid common pitfalls. David believes that trust and transparency are the cornerstone of the client-advisor relationship. Since joining Fidelity Investments in 2010 David has held roles as a trader, advisor, consultant, and more. David is a Certified Financial Planner (CFP®) and received a BA in Finance from Coastal Carolina University.

Tim Courtney, CIMA

Chief Investment Officer
(405) 478-1971
acartwright@exencialwealth.com

Tim Courtney serves as Chief Investment Officer of Exencial Wealth Advisors and chairs the investment committee. He attained the Certified Investment Management Analyst (CIMA) designation in 2005 and has more than 15 years of experience advising individuals, corporations and organizations on investments and markets, tax planning and retirement. Much of Tim's time is spent meeting with clients, formulating and advising on client strategies, and performing investment and portfolio research.

Ada Cartwright, CPA/PFS

Tax Director
(210) 738-3888
acartwright@exencialwealth.com

Ada M. Cartright, CPA/PFS joined Exencial Wealth Advisors in April 2016. She and the San Antonio tax team work as part of Exencial's regional tax team working closely with the account managers and clients to provide clients excellent tax services and consulting. Her experience includes working with high net-worth individuals and their related trusts, as well their businesses set up as corporations and partnerships.

E³ FORMULA

Exencial
Wealth Advisors™

Our processes are developed, designed, and refined to cater to the busy executive. Our ultimate goal is to understand your family, occupational, and recreational goals and create a clear connection to your capital.

We evaluate, execute and evolve to stay dynamic and adaptable as your goals become realities. We are here to help guide you along the way.

FAMILY

OCCUPATION

RECREATION

MONEY

WHAT IS IT ALL FOR?

Essential to great financial health is the creation of a financial plan - a detailed, goals-based map of what needs to happen to get you from where you're at to where you want to be.

FAMILY

The first “why” is typically the most important to clients. Spending time with family, providing for loved ones, and leaving a lasting legacy are often important goals for our clients.

RECREATION

Passions drive all of us. Whether that be spending time on the golf course, running marathons, or traveling the globe, everyone needs a passion. Planning for and adequately providing for these passions is important.

OCCUPATION

Your occupation is one of the main driving factors in achieving your financial goals. Understanding clients’ occupational goals allows for us to better plan for retirement.

MONEY

Money is the “how” behind achieving all of your goals. Whether it be taking a family vacation, retiring early, or funding a passion project, money helps you accomplish your life’s goals.

FOCUS ON WHAT MATTERS

Our commitment: never lose sight of what matters most to our clients. Whether that is their family, their occupation, or their recreation. Their money allows them to do what they love.

CERTIFIED FINANCIAL PLANNER™ (CFP®)

Working with a Certified Financial Planner™ ensures you're working with a highly qualified advisor who has passed the rigorous experience and education required to obtain this designation. Not only must they meet these requirements, but they are also held to the highest professional and ethical standards. This certification adds a dual layer of fiduciary standards on top of those inherently present in working with a registered investment advisor.

CERTIFIED PUBLIC ACCOUNTANT (CPA)

Utilizing the expertise of a Certified Public Accountant, you can rest easy at night knowing you have a professional with the knowledge to act as an accounting consultant, tax consultant, and business advisor. This expert knowledge is invaluable in advising you on a variety of situations which frees up your precious time to focus on what is most important to you.

CERTIFIED INVESTMENT MANAGEMENT ANALYST (CIMA)

Having a Certified Investment Management Analyst working behind the scenes to construct a portfolio tailored to you means you can worry less about your investments and more about the things that matter most. Extensive knowledge of investments, behavioral finance, technical analysis, and many other financial topics leads to being recognized as a standard for advanced investment consulting by the financial services industry.

OUR EXPERTISE

CHARTERED FINANCIAL ANALYST (CFA Charterholder)

The Chartered Financial Analyst credential is one of the most respected designations in finance related qualifications. This three-tiered charter requires over 1,000 hours of study and work experience culminating in a professional who has achieved the “gold-standard” of investment analysis. Similar to the Certified Financial Planner®, the Chartered Financial Analyst must live up to a high level of professional and ethical standards.

JURIS DOCTOR (JD)

Having team members that are legal professionals with backgrounds in multiple areas of discipline allow us to extend our ways of thinking and situational analysis to provide our clients with solutions and advice that encompass areas outside of the numbers and investments.

BRINGING IT ALL TOGETHER

Bringing together a qualified group of professionals to serve our clients has been the goal of Exencial from day one. We believe coordinating all aspects of our clients' financial pictures creates cohesiveness among the different disciplines and produces higher quality outcomes. Having an array of high quality, in-house experts allows us to guide clients in a manner that facilitates achieving the goals they've formed.

RESEARCH METHODOLOGY

Our research methodology is built upon a time-tested, three-stage process. This process is top-down driven and has a strong emphasis on identifying quality, based on peer-to-peer analysis in each industry and sector. Importantly, we leverage this research process across all our equity portfolio strategies.

· Stage 1: Qualitative Analysis

We define quality as the sustainable competitive advantage a company enjoys over its competition. We have developed a checklist to assess competitive advantage including the following variables: product, price, service, management, cost position, market position, financial strength, strategic planning, technology, and execution. This is a dynamic process whereby different variables are given greater weight in some industries while given lesser weight in others. The key is to determine what each company may possess.

· Stage 2: Top-Down Analysis

In this stage we identify long-term market drivers, or secular trends, which determine the sectors of the market likely to outperform and those likely to underperform the overall market. Based on this analysis, we will position portfolios to hold a larger or smaller position in relation to the sector weights in the S&P 500. Actual sector weightings may vary across our different equity strategies reflecting the unique characteristics of each.

· Stage 3: Quantitative Analysis

In the third stage we utilize industry-specific valuation methodologies to determine the upside and downside potential for stocks that pass our qualitative screens. Typically, this involved approximately 200 companies. Valuation parameters include: Price/Earnings (PE), Price/Cash Flow (PCF), Price to Growth (PEG), and Price/Book Value (PBV).

• Portfolio Review

Our investment team is continually reexamining the holdings, in all of our equity portfolio strategies, in the content of our three-step investment process. We continually challenge our qualitative assessments as the competitive landscape changes in response to the economy or other market forces. Likewise, we continually retest our overall top-down strategy through the various stages of the economic cycle. Lastly, through our quantitative valuation models, we monitor the relative upside and downside of each individual stock in the portfolio.

• Sell Discipline

Our sell discipline flows from our three-step process: First, if a company loses its quality – no longer has a sustainable competitive advantage vs. its competition – it would be a candidate for sale. Second, a change in the top-down strategy may lead to increased exposure in one sector and reducing exposure in another sector. Third, if a stock becomes over-valued based on our valuation analysis, it may be a candidate for sale.

A person in a dark suit is shown from the chest down, carefully balancing a stack of light-colored wooden blocks. The person's hands are visible, one holding a block in place. The background is a dark, blurred image of the person's torso and arms. The overall scene is set against a blue gradient background on the left side of the image.

**RISK
MANAGEMENT**

WHEN IS A MANAGER, FUND, OR STRATEGY REMOVED FROM YOUR PLATFORM?

Underperformance

If a manager, fund, or strategy meaningfully underperforms parameters, a reevaluation is customary, and one of the following will occur:

- **Buy more** – if the investment thesis is still in-tact and we are accumulating a normal position size, we will buy more at lower prices.
- **Hold** – if the thesis is still in-tact but confidence is lower, we will continue to hold it but will closely monitor it.
- **Sell** – if the thesis is no longer in-tact or a more attractive opportunity presents itself, the position will be reduced or removed entirely.

Manager Turnover, Strategy Changes, or Other Risk Introduced

If the manager or strategy has leadership turnover either at the portfolio manager or ownership level, it will trigger a reevaluation and may be removed from the platform. Other considerations are investment style changes, fee changes, or tax policy changes.

Outperformance

If a manager, fund, or strategy meaningfully outperforms, a similar reevaluation is triggered and one of the following will occur:

- **Buy more** – this mainly applies to individual securities but if our thesis is accomplished and is building momentum, in some cases it makes sense to increase the position size.
- **Hold** – if our thesis is accomplished and there aren't more attractive alternatives, the position will be maintained with increased expectations.
- **Sell** – if a company or even secular trend has run its course or there are more attractive alternatives, the position will be reduced or removed to invest in the alternatives (*i.e. acquired high yield bonds in 2000, sold them to invest in equities*).

PROCESS FOR MEASURING INVESTMENT PERFORMANCE

Portfolio Performance:

We analyze family needs through our E3 Process to determine required returns for the portfolio. This expected return determines the portfolio allocation and is compared against actual performance in regular review meetings. Other portfolio expectations may concern taxes, avoiding exposure in particular areas (ESG responsible), etc.

Investment Performance:

Focusing on the actual investments of the manager or a strategy level, performance is compared against its closest, main-stream industry benchmark. In this comparison the actual internal rate of return (IRR) is used for comparison unless capital was dollar cost averaged in; in that case, the time weighted return (TWR) is used.

Another area of performance we analyze within the actual strategies is the attribution of industry over and under-weightings. This is analyzed from a return opportunity aspect as well as a risk mitigation aspect.

*Wealth Advisors*TM

A woman with long dark hair, wearing a white t-shirt, is sitting at a desk. She is smiling and looking down at a laptop. There are papers and a pen on the desk. The background is slightly blurred, showing what appears to be an office or home workspace.

**INCOME
& EQUITY**

PUBLIC MARKETS STRATEGIES: RISK - RETURN

CUSTOMIZED PORTFOLIOS TO CONTROL RISK & RETURN PROFILES.

Diversified but not over diversified.

Tax sensitive portfolio management.

Seeks to **mitigate adverse investor behaviors**, such as chasing market returns or making knee-jerk reactions to news releases.

LEGEND:

OFFENSE

DEFENSE

INCOME

Fixed Income

Our focus in selecting fixed income securities is primarily based on credit quality and cash flow, while also providing yield generation. We believe that fixed income provides a strong foundation to a balanced portfolio; therefore, we reduce risk by investing in companies with low default risk. Taxable bond portfolios are constructed using US Treasury, US Agency, or investment grade corporate bonds. We currently favor Agencies and corporate bonds due to the low returns offered by US Treasuries. Tax-free bond portfolios are constructed using high-quality municipal bonds from the state in which the client resides. Interest rates rise and fall; however, high-quality bonds mature at par. Our preference is to defensively position portfolios in high-quality bonds with average duration of 5 years and shorter or structured bonds that have coupons that will step up if rates rise.

Equity Income

Generating steady income from traditional fixed income investments is currently a challenge due to the low-interest rate environment. The Equity Income Strategy attempts to overcome this by building a diversified portfolio of income-generating securities across asset classes and sectors. While this strategy does contain more risk than traditional high-quality bonds, we believe the long-term risk is lower compared to a strategy of holding long-dated or lower-quality bonds.

Covered Call

A covered call strategy consists of two parts: owning one or more stocks or stock funds and selling a call option tied to those stocks or funds. When you sell a call option, you immediately receive income which increases the return of your portfolio. However, you also relinquish claim to the stocks or funds' appreciation above a certain price. The goal a covered call strategy is to generate income and partially hedge the risk that the stocks or funds may have low or negative returns in the future.

While certain option strategies can be high risk, a covered call strategy usually lowers the overall risk of a stock portfolio. The income received from selling call options dampens the volatility of a portfolio, which generally means the portfolio loses less money when stock prices fall but also makes less money when stock prices are rising rapidly. A covered call strategy is ideal in a relatively flat or slightly positive market environment. In these scenarios, the owner of a covered call portfolio receives income from selling calls, dividend income from the underlying stocks, and modest appreciation potential of the underlying shares.

U.S. EQUITY

Defensive Equity

This strategy is invested in most major economic sectors as defined by the S&P 500. We focus on 25-30 high-quality companies that have delivered stable and consistent returns through the business cycle. This strategy seeks a balance of income and growth with competitive returns. The goal of the strategy is to have lower volatility than the S&P 500, as measured by beta. The historical beta to the S&P is .69 since inception.

Core Equity Strategy

This strategy is typically comprised of 35-40 high-quality, industry-leading growth stocks. This strategy is predominately large-cap, but may also include small-cap, mid-cap, and international stocks. From a quantitative perspective, we strive to have an overall strategy with a PE ratio close to the market, but with an average earnings growth significantly greater than the overall market.

Value Strategy

The Value Strategy is typically comprised of 35-40 stocks. The market's short-term focus routinely underestimates characteristics like durability and sustainability and consequently the intrinsic value of these businesses. We have found that paying a reasonable price for a business with the above characteristics will lead to above-average stock price performance over time.

INTERNATIONAL EQUITY

International Equity Strategy

The International Equity Strategy will focus on high-quality, industry-leading companies that are domiciled outside of the US. International Equity Strategy focuses largely on identifying investment trends and opportunities in developed international markets but may invest directly in emerging markets provided the companies in question meet Exencial's quality criteria. Emerging markets can offer superior growth prospects due to favorable demographic and per-capita income trends.

Thematic ETF Strategy

The Thematic ETF portfolio focuses on identifying sustainable, game-changing secular trends, and building a diversified portfolio of ETFs which are directly exposed to these themes. Importantly, our research process distinguishes short-term fads from sustainable, long-term trends. To accomplish this important filtering process, we leverage our existing research and portfolio management methodology for the Core Equity strategy. Some good examples of secular trends are the build-out of the Internet in the mid to late 90s, social networking, the move to mobile devices, and the increasing role and importance of "Big Data". This portfolio is relatively concentrated, holding 10-15 ETFs. At the same time, the overall philosophy of this portfolio lends itself to significant exposure to technology-related sectors. Both factors are likely to make this portfolio more volatile than the overall market.

Past performance is not indicative of future performance. As with any investment strategy, there is potential for profit as well as the possibility of loss. Investment returns will fluctuate and are subject to market volatility; any investment when redeemed or sold may be worth more or less than its original cost. Significant losses of invested capital, including the loss of the complete investment, are possible. Different types of investments involve varying degrees of risk. It should not be assumed that diversification or asset allocation protects a portfolio from loss or that such will produce profitable results. The information contained herein should not be construed as personalized advice nor is it intended to constitute investment, tax, or legal advice. The information in these materials may change at any time without notice.

The S&P 500 is a stock market index tracking the performance of 500 large companies listed on stock exchanges in the United States. It is one of the most commonly followed equity indices.

“Beta is a statistical measure of the volatility of a stock versus the overall market. It’s generally used as both a measure of systematic risk and a performance measure. The market is described as having a beta of 1. The beta for a stock describes how much the stock’s price moves compared to the market”
